Natural Pain Relieving Gel Ingredients and Functions

Cool Therapy

Ingredient	Function
Menthol	Obtained naturally from various mint species, it is used to give a cool feeling to the skin after application and is a mild, local anesthetic
Aloe Barbadensis Leaf Juice (Aloe Vera Extract)	Extracted from the leaves of one or more species of aloe, it is used to treat burns and minor abrasions
Camellia Sinensis (Green Tea) Leaf Extract	Contains both antioxidant and anti-inflammatory properties
Caprylyl Glycol	Reduces the amount of moisture lost on the skin and helps preserve the gel
Carbomer	A compound that is used as a thickening agent for the gel
Citrus Grandis (Grapefruit) Seed Extract	A fungicidal agent that is gentle on the skin
Citrus Limon (Lemon) Peel Oil	Derived from lemon rinds, it works as an astringent

Ingredients and Functions - Cool Therapy - page 2

Ingredient	Function
Decyl Glucoside	Comprised of glucose derived from corn and the fats from coconut and palm kernel oils, it reduces the surface tension of a liquid to allow it to form a solid. Also known as a wetting agent.
Glycerin	A naturally occurring moisturizer
Hamamelis Virginiana (Witch Hazel) Leaf Extract	An astringent with antibacterial properties
Phenoxyethanol	A stabilizing preservative
Rosa Damascena Flower Water	A naturally occurring skin conditioner and mild astringent used to improve the appearance of the skin with a pleasing fragrance
Sodium Carbonate	Maintains the pH balance of the gel
Spiraea Ulmaria Flower (Queen of the Prairie) Extract	An anti-inflammatory agent, astringent and skin protector
Yucca Schidigera Root Extract	An astringent and skin conditioner
