

Ingredient Label Update Notice

We would like to inform our customers of an upcoming update to our ingredient labeling.

As part of our ongoing commitment to transparency and regulatory alignment, we are updating the way one of our botanical ingredients is listed on our product labels. The ingredient previously identified as *Queen of the Prairie* will now be listed under its standardized INCI (International Nomenclature of Cosmetic Ingredients) name: *Filipendula Ulmaria (Meadowsweet) Flower Extract*.

Please note that this is a labeling update only. There has been **no change in the formulation, quality, sourcing, or performance** of the product. The ingredient itself remains the same and continues to meet our strict standards for safety and efficacy.

This update reflects a transition to our vendor's INCI naming convention to ensure consistency, clarity, and compliance with industry labeling standards.

We appreciate your continued trust in our products and remain committed to delivering the same high-quality formulations you rely on.

If you have any questions, please contact our customer support team at sombraorders@sombraUSA.com
